Subject: Antitrust settlement

I am from a small country which is dominated by Microsoft software. They are, in my belief, stamping out any form of competition in our primary areas of Government and Education.

I am appalled by the DoJ settlement because I cannot see any form of punitive action, nor any remedy to prevent the continuation of abuse by this software monopoly.

The danger of allowing Microsoft to continue its blatant behaviour is to see the U.S. become isolated technologically from the rest of world, Europe, and Asia in particular. The perception here is that Microsoft is above the law, untouchable, contemptuous of justice, and encouraged by the current U.S. Administration.

I support the states that oppose the settlement. It is a pity that they have to try and do what the DoJ should have done.

Yours sincerely
